

# Eth On Eth: The Peoples Coin

---

**Introducing ETH ON ETH:** At the heart of the crypto movement lies a promise - a decentralized world where power is returned to the people. We believe in a future where tokens serve their community, not just a handful of founders or early investors. This is our commitment with ETH ON ETH, a token by the community, for the community.

**Why ETH ON ETH?** The name isn't just a playful nod to the Ethereum network. It's symbolic of our philosophy: a foundation that doubles down on the principles of Ethereum itself. ETH ON ETH is more than a token; it's a statement.

## Our Promises:

- **No Founder Sales:** The crypto world has seen its fair share of projects where founders or major stakeholders sell off significant portions, often affecting market sentiment and value. With ETH ON ETH, we pledge that founders will not sell any tokens. Our commitment is to the longevity and health of the project.
- **No Team Tokens:** We're stepping away from the typical model. There are no team token allocations. Every token that exists is for the community and ecosystem, ensuring that there's no undue concentration of power or wealth.
- **Transparent Processes:** Our smart contract is open for scrutiny. The community can audit and verify that there are no backdoors, no hidden mint functions, and no chance for unscheduled releases.
- **Community First:** We're not just launching a token; we're nurturing a community. All future developments, project directions, and major decisions will be proposed to the community, ensuring the true spirit of decentralization.
- **Safety and Security:** In line with our commitment to transparency and community trust, we will undertake third-party audits to ensure that the ETH ON ETH smart contract meets the highest standards of security.

---

## Ethonomics:

- **Total Supply:** 120,250,550
- **0/0 Tax**
- **LP locked**
- **Contract Renounced**

In a landscape where trust is rare, ETH ON ETH aims to be the gold standard. We're not here for short-term gains; we're here to craft a legacy. We envision a project where every holder sleeps soundly, knowing their investment is not at the mercy of a select few.

Join us in making history. Be part of the ETH ON ETH revolution – a token that embodies the very essence of trust, community, and unwavering commitment.
